- No names, emails, or roll numbers collected
- Results shown only as overall percentages
- Completely anonymous — your responses stay private

THE PROBLEM

The Problem Is Real

Online exams are harder to monitor than ever. Basic tools don't track real behavior — and privacy concerns rule out camera-heavy solutions.

No Real Tracking

Standard forms can't detect phone use, tab switching, or outside help.

Privacy Risks

Camera-based proctoring raises serious trust and compliance concerns.

Unscalable

Manual monitoring doesn't scale — and most tools miss real user behavior.

This is the gap ObserveX is designed to solve.

OUR SOLUTION

Introducing ObserveX

Smarter Monitoring. Better Integrity.

A privacy-first monitoring platform for online exams, training sessions, and digital workspaces. Built for institutions and organizations — designed to keep data local and controlled.

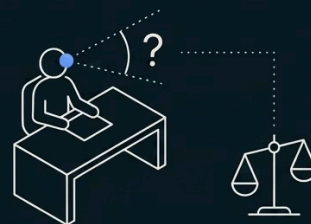

Built by The Watchers

- Qalb E Zahra Mashhadi — Team Lead
- Alishba Amjad — Vision Module
- Aliha Ehsan — System Monitoring Module

Current Solutions Still Leave Gaps

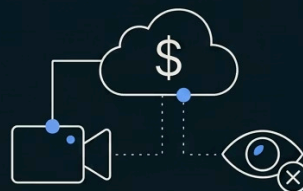

Today's tools either lack monitoring depth, violate privacy, or cost too much. ObserveX fills the gap — real behavioral monitoring, locally stored data, and an affordable price for institutions.

Manual Monitoring
LIMITED, HARD TO SCALE,
NO BEHAVIOR TRACKING

Google/Microsoft Forms
USEFUL FOR TESTS,
WEAK FOR MONITORING,
NO ACTIVITY TRACKING

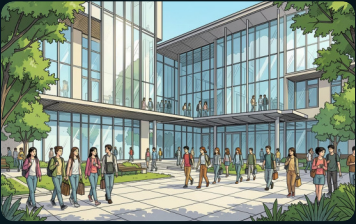

Cloud Proctoring
COSTLY, PRIVACY-SENSITIVE,
REQUIRES INTERNET

ObserveX
PRIVACY-FIRST, LOCAL DATA,
REAL BEHAVIOR TRACKING,
AFFORDABLE.

OUR AUDIENCE

Who It Helps

Universities & Colleges

Secure online exams at scale without compromising student privacy.

Online Exam Centers

Monitor test-takers in real time with automated, privacy-safe tools.

Training Institutes & Companies

Keep digital training sessions focused, productive, and accountable.

Better Exam Integrity

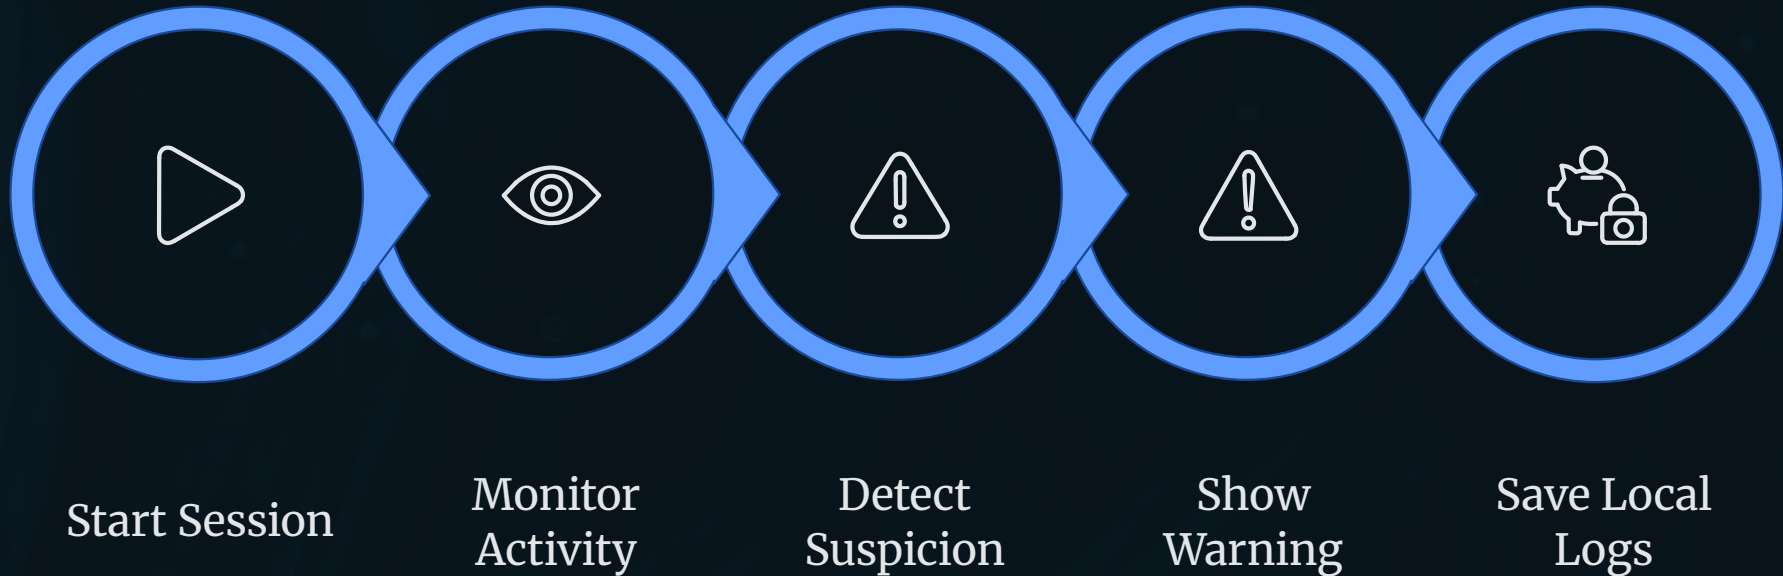

Privacy-Conscious

Focused Sessions

Affordable

HOW IT WORKS

How ObserveX Works

ObserveX runs a lightweight local session that monitors user activity in real time — no cloud uploads, no third-party data sharing. Suspicious behavior triggers an on-screen warning, and all logs stay on the institution's own system.

MVP Progress & Live Demo

✓ Built So Far

- Vision module working
- System monitoring active
- Main code setup ready
- Local logging operational
- Live demo ready

🔧 In Progress

- Phone detection refinement
- Camera + dashboard unified view
- Warning popup polish
- Central dashboard refinement
- Real-time processing stability

Python

OpenCV

MediaPipe
